ADDITIONAL SPRAY AREA FOR ADULT MOSQUITO CONTROL

(STOCKTON, CA) – In response to increased adult mosquito populations and the detection of West Nile virus in several areas of San Joaquin County, the San Joaquin County Mosquito and Vector Control District (District) is preparing to conduct ground spraying for adult mosquito control.

The District will continue to implement the California Mosquito-Borne Virus Surveillance and Response Plan to protect public health and welfare. Spray locations and times will normally be available 24 hours in advance. **People can access spray information and spray schedules by calling the District at (209) 982-4675 or toll-free at 1-800-300-4675 during business hours from 7:00 a.m. to 12:00 p.m. and 12:30 p.m. to 3:30 p.m., Monday through Friday or by visiting the District's website online at www.sjmosquito.org.**

Due to increased adult mosquito populations and/or detection of West Nile virus, the following area is scheduled for spraying:

Ground spraying for adult mosquito control using MGK Pyrocide 7396 or Evergreen 60-6 is scheduled for the morning of Saturday, July 31, 2010, between 4:00 a.m. – 6:00 a.m. or the morning of Sunday August 1, 2010 between 4:00 a.m. – 6:00 a.m.

- **South Manteca Area - Manteca** > North to Yosemite Ave and Hwy 120 at Airport Way, > South to Woodward Ave., > East to Main St., > West to McKinley and Airport Way at Hwy 120

Spraying for adult mosquitoes is done near sunset or sunrise with trucks and airplanes when mosquitoes are most active. The District will be using sprayers that apply a very fine mist of material that kills adult mosquitoes on contact. Control operations are contingent upon favorable weather conditions and if canceled, will **typically be rescheduled to the following morning or evening.**

To request District service, call (209) 982-4675, 1-800-300-4675 or visit the District website at www.simosquito.org
